CAREER SUMMARY

Product Owner and Product Manager with 3+ years of experience delivering digital products across Healthcare, E-learning, E-commerce, ERP, and Dashboards. Skilled in product discovery, requirements analysis, backlog prioritization, roadmaps, UX prototyping, product analytics, Agile delivery, and stakeholder management.

WORK EXPERIENCE

Senior Product Owner | InnoTech

May 2025 - Present

- Own delivery for Gulf/KSA digital healthcare and education products, from discovery and planning through release and UAT.
- Manage product roadmaps and Jira backlogs; prioritize initiatives, write user stories, and lead cross-functional delivery.
- Gather and analyze stakeholder requirements, translating them into SRS, workflows, user stories, and Acceptance Criteria.
- Validate requirements and proposed solutions with stakeholders, Developers, and QA; maintain readiness and traceability in Jira.
- Support UAT/testing, verify delivered features against Acceptance Criteria, and prototype product flows before development when needed.

Instructor UI/UX | AMIT Learning – Part Time

June 2025 - Present

- Deliver UI/UX training and review practical assignments focused on user-centered design and prototyping.

Business Analyst | Qeema Tech

Apr 2024 - May 2025

- Gathered and analyzed requirements; produced workflows, user stories, and Acceptance Criteria for delivery teams.
- Aligned stakeholders and technical teams through requirement validation, backlog refinement, and solution clarification.
- Mapped As-Is and To-Be processes and performed gap analysis to identify workflow improvements and solution dependencies.
- Supported backlog refinement, UAT, and change-impact analysis to ensure delivered features aligned with approved requirements.

Product Designer | SOFCO

Jan 2024- Dec 2024

- Conducted user research and task analysis to identify operational and admin workflow pain points.
- Created user flows, wireframes, and interactive prototypes; validated product concepts before development.
